

Our Power Utility Services

Since 2001, Valorec has been belonging to the leading energy service providers in Basle. Our power utility department oversees the service and maintenance of safety-appropriate power supply facilities of the Basle Novartis plants - from the interfaces of the energy suppliers to the terminals blocks of the cable connections in the buildings.

Service is our priority

We produce and distribute electric power. Our dedicated grid service team manages projects in accordance with the Swiss electric power guidelines. Our tasks include the installation, operation and maintenance of electrical equipment. We develop customised solutions in every area of electric power supply at a fair price. For emergency cases, we are available 365 days a year with our 24-hour on-call service. Our comprehensive service from consulting up to analysis and concept creation according to individual customer needs is what sets us apart.

Our service team

If full performance is required, our commitment is at a high tension- and all that with the greatest precision possible! Smart brains solve challenging tasks with a high level of personal responsibility and creative action - every single person is qualified at the highest level, works with commitment, efficiently and in a quality-oriented manner. Processes are kept transparent and simple.

«Those who wish to be successful in the future must mobilise their strengths. Qualified employees are the value of a company. In times of growing customer and quality demands, you need one thing most of all: the willingness and skills for permanent further development and change. Our employees have the technical competence and the infrastructure – their skills, their unique knowledge and their commitment are the best advertising we have.»

Stephan Böni, Team Leader - Electric Power Utility
